

Malone's Mechanical, Inc.  
Gives Back

The Mickey Malone Family values Sparks Regional Medical Center, its mission and the services it provides to our area people. About 30 of Malone's Mechanical, Inc.'s 45 employees were very involved with building the recently completed *Emergency & Critical Care Center*. This Company provided and installed the underground plumbing and fixtures; water pipes and related fixtures; medical gas and gauges; as well as two 1000 ton chillers for air conditioning; 600 horsepower boiler to produce heat; and 200 variable air boxes

Malone's Mechanical Inc. was created in 1973, 35 years ago, by Mickey and Judy Malone. It has grown from a small operation in their garage to a facility that covers 4 acres. They specialize in Commercial Mechanical, Industrial Plant Maintenance & Renovations.

Sadly, Mickey Malone was killed in 1988 as he and a pilot were flying to a job in the East. His wife Judy and their 4 sons, Michael, Stephen, Eldon, and Marc, have successfully carried on with the business with the help of a loyal business friend, Bill James. Bill joined the business in 1975 and continues to fill the role of bidding and securing jobs, as well as performing other technical functions.

If you want to meet a bunch of friendly and fine people, then meet Judy, her four sons, and Bill James. This family business culminated this particular Sparks building project by making a generous five-figure gift to the Sparks Foundation. Their gift, along with many others, is being used to help build the "New Sparks Hospital – Our Community Hospital," and we are grateful.
